

Tourism “for all” in Gipuzkoa

Gipuzkoa’s desire is to offer everybody –regardless of his or her capacities– the opportunity to enjoy its territory.

Therefore, and as a first step, the province has carried out a study to offer people with functional diversity information about the services adapted to their specific accessibility needs.

The study, carried out by qualified experts, has been developed during the period 2006-2007 in more than 500 tourist establishments, based on a series of accessibility guidelines that will be specified below.

At this point, a more ambitious project is being carried out. The results will be soon available and integrated into the establishments’ dossier to allow a standardized search.

Both the information and the presentation format will be optimized soon in order to make them as accessible as possible for all.

We hope this advance allows us all to start enjoying this great territory!
